| USB Device Manage |
|---|
| Insert your **USB device** in **the iMac USB slot,** or an **external USB hub** connected to a **USBC slot**, located directly on the back side of the iMac.

From the **finder menu**, **tap on File,** and then from **File**, **tap on** the **new Finder Window** menu. When your **device** mounts under the **favorite Sidebar**, directly below under **Locations**. |

Removing your device from the SideBar	
Upon **removing your USB device** from the **Apple device**, **tap** on the **name of your USB device**, drive, etc., and select the **Control key** on the **keyboard**, and **concurrently select the right side of your mouse** to **preview** the **device menu**, allowing you to **securely Remove from Sidebar.**	
If you are using **Ventura OSX**, you can **eject** your **USB device**, by selecting your USB device from the desktop or finder menu and selecting the **Command + E key** on the keyboard.
