

Edit Password Protected PDF documents. From Adobe Acrobat DC Windows

<p>Open the Adobe Acrobat DC application. Next, go to your OneDrive location, from the file explorer folder, and open your file.</p>	
<p>Upon trying to export the document to Word, if you get the following message, which explains that the document is password protected.</p>	
<p>From the Adobe DC application, tap on the left top Menu, in the upper left corner, and then tap on the Save As section. Which will default as a PDF file, type a different name for your file, to the same location, OneDrive, and then select the save button.</p>	
<p>From the top left, go to Menu, tap on Export, and then select PDF to Word, and your document will open in the Microsoft Desktop Word application.</p>
