

SharePoint Mount Drive for the Mac computer

Open your **OneDrive icon**, from the **Application folder**, setup and make sure all your files are **synchronizing**.

After your files have **Synced** to your **OneDrive**, go to **office.com**, use your **SHU credentials** to log in open your **SharePoint Site**, and tap on the **document folder**.

From the **top Menu** tap on the **Sync icon**. The **SharePoint folder** will map under the Mac, under the **favorites section** on the left section of your computer.

Tap on the **Allow button**, Now, that **OneDrive** is already open, (**Pending on your files**) you might get we are **synchronizing** your files. If your **Personal OneDrive** is set on the inside of **your user folder**, click on the **OneDrive** and your **Siena Heights SharePoint drives**, and drag the **folders** under your **favorites section**, from the **Application folder**.
