

FSSE 2014 Frequencies About This Report

The display below highlights details in the *FSSE Frequencies* report that are important to keep in mind when interpreting your results. For more information about the survey, please visit our Web site (**fsse.iub.edu**) or contact a member of the FSSE team.

- 1. *Sample:* The *FSSE Frequencies* report is based on information from all faculty at your institution who responded to the survey based on their experiences teaching either a lower- or upper-division course. Faculty who responded based on another type of course or who did not report the course level are not included in this report.
- 2. Class level: Frequency distributions are reported separately for faculty who teach lower-division and upper-division courses.
- 3. *Item numbers:* Item numbering corresponds to the survey facsimile included in your *Institutional Report* and available on the FSSE Web site.

- 4. *Item wording and variable names:* Survey items are in the same order and wording as they appear on the instrument. Variable names are included for easy reference to your data file and codebook.
- 5. Response options: Response options are listed just as they appear on the instrument.
- 6. *Count and column percentage (%):* The Count column contains the number of faculty who selected the corresponding response option. The column percentage represents the percentage of faculty selecting the corresponding response option.
